I am reading a book called Game of Life. I have problems with the following sentence. The function for the simulation is described in the standard textbook of life. The simulation starts with the initial cell state $SC_0 = (0,0,1)$. The new state of the cell at time t is $SC_t = (a,b,c)$ where a , b and c are the number of dead, live and alive neighbours of the cell at time t respectively. Why is 'as' being used after 'of' in the sentence? Shouldn't it be 'in the standard textbook of life' instead of 'as'? A: No, that's not a mistake. You have to read the meaning of that word. What is the word "as" being used for in your context? Well, as is often used in certain phrases or clauses, it's used to mean "in the same way as". Architects and civil engineers can go from concept to construction documentation with Revit®, for free. So, for example, if you need to integrate AutoCAD Architecture and Revit® Architecture into your workflow, you can select the AutoCAD Architecture Add-on for Revit® and use it to easily incorporate AutoCAD Architecture with Revit®. Or, if you're a civil engineer, you can select the AutoCAD Mechanical Design Add-on for Revit® to see how the objects you draw in AutoCAD Architecture match up to the entities you create in Revit® Mechanical. The new capabilities are made possible by a new Revit® Add-on. The Revit® Add-on allows AutoCAD Architecture and AutoCAD Mechanical Design to communicate with each other for fast communication and collaboration, with a shared model that includes the capability to convert between the two applications.
