

Thank you in advance, A: Note that you should know whether the string is only in the file's content or the file is also present in the meta tags. For the file's content to be copied in the web server you have to provide the MIME type by setting `AddType application/octet-stream.log` in the server's configuration file (I used a Freenas configuration file, but it should look like this for Debian). However, you should find that the file is being downloaded for the web server, but you won't find any web server logs. This can be solved by setting `TransferLog /home/user/logs/php_error.log` in the server's configuration file (again, I used a Freenas configuration file, but it should look like this for Debian).

He said the US military has “taught us the tools to fight evil and defend our allies” – and he called on Americans to rally behind the mission. The White House made it clear that Trump’s comments about abandoning NATO were not the result of a change in US policy. “The US stands by and continues to respect NATO’s Article 5 mutual defense principle, and NATO remains one of America’s most important alliances,” said White House spokesman Eric Schultz. But Trump’s own campaign has now joined the chorus of praise for the US military. The Republican frontrunner has been on the attack over his insistence that America’s nuclear arsenal is in need of deep-cutting, saying in a rally on Monday that ❖
