Recommendations AVI to 3GP Converter by G+1 Free Free Free AVI to 3GP Converter is an easy to use, yet powerful software solution developed to convert AVI files to 3GP. Pretty helpful for those who want to play their favorite videos on a mobile phone, the application tries to keep things simple, so the intuitive GUI should be enough to serve its purpose. With large buttons at the top of the main window and a preview panel to help users watch the clips they are about to convert, AVI to 3GP Converter is generally an easy to use app, but you may still need a few seconds to figure out the purpose of each tool. Simply add the files you want to convert to the file queue, choose an output folder and you're all set. Additionally, AVI to 3GP Converter also gives you the power to resize the videos by writing down a custom resolution, while dedicated options help you set different begin and end times. A settings screen is available too, and this is the only place to find more advanced options such as video and audio codecs, video bitrate and audio sample rate. The conversion job doesn't take much time and that's definitely a very good thing, especially given the fact that AVI to 3GP Converter needs a moderate amount of hardware resources. But overall, AVI to 3GP Converter makes for a decent video conversion software, although we all agree that there still are some things to be improved. Support for many more formats and more configuration options concerning the output file, they're all needed to attract more users.Q: What's the best way to get a list of all the plugins a content type supports? The impact of youth violence, crime, and the fear of crime on sexual activity among middle-school aged adolescents. The purpose of this article is to examine the relationship between youth violence and crime, fear of crime, and sexual activity among a national sample of middle school students. Data are from the School Health and Safety Study, a survey conducted in 1993-94. The analyses involve descriptive and multivariate statistics, including both bivariate and multivariate logistic regressions. Results indicate that several types of youth violence, as well as the fear of violence, are significantly related to sexual activity. Of particular importance are the findings that the fear of violence is significantly associated with sexual activity, as is the fear of crime. Youth violence and fear of crime are also significantly related to one another.
